

Kenan Alshagory

0956537577 | kalshagory@gmail.com | Damascus, Mazzeh

Professional Summary

A dedicated DevOps Engineer with over two years of hands-on experience in designing, automating, and maintaining scalable and secure infrastructure. Strong expertise in CI/CD pipeline implementation using Jenkins, containerization with Docker, and configuration management with Ansible. Experienced in managing cloud environments on AWS (EC2, S3, RDS, VPC), optimizing system performance, and ensuring high availability. Proficient in Linux systems, networking, load balancing, monitoring, and logging with Prometheus, Grafana, and the ELK Stack. Proven ability to work in remote environments, collaborate with cross-functional teams, and deliver reliable DevOps solutions that improve deployment speed, stability, and security.

Technical Skills

- **Databases:** MySQL, PostgreSQL, Redis
 - **DevOps & Automation:** CI/CD, Jenkins, Ansible, Docker
 - **Cloud & Infrastructure:** Amazon Web Services (AWS) (EC2, S3, RDS, VPC), VPS Management, Nginx, Apache
 - **System & Networking:** Linux (Ubuntu, CentOS), Bash Scripting, Load Balancing, Network Security
 - **Monitoring & Logging:** Prometheus, Grafana, ELK Stack
 - **Version Control:** Git, GitHub, GitLab
 - **Other:** JIRA, Problem-Solving
-

Professional Experience

DevOps Engineer | SheenValue Company | July 2024 – Present

- Designed, implemented, and managed CI/CD pipelines using Jenkins, reducing deployment time by 40% and automating build, testing, and deployment processes.
- Containerized applications using Docker improving scalability and resource management.
- Managed and configured AWS cloud infrastructure, including EC2 instances, S3 storage, and RDS databases, ensuring high availability and fault tolerance.
- Automated infrastructure provisioning and configuration management with Ansible, ensuring consistency across development, staging, and production environments.
- Implemented robust backup and recovery strategies for critical data and services.
- Configured and maintained load balancers (Nginx) to distribute traffic efficiently and enhance application performance.
- Conducted regular security audits and implemented security best practices to protect infrastructure and applications from threats.

DevOps Engineer (Remote) | Nexora | October 2025 – Present

- Worked remotely as a DevOps Engineer supporting cloud-based applications and development teams.
- Built and maintained CI/CD pipelines to automate build, test, and deployment workflows.
- Containerized applications using Docker to improve deployment consistency and scalability.

- Assisted in managing cloud infrastructure and server environments, ensuring uptime and performance.
 - Collaborated with developers to improve release processes and resolve deployment issues.
-

Education

Education Fifth-year student, majoring in Artificial Intelligence

Faculty of Information Engineering, Damascus University
